HEAVY DUTY PROTECTION

- 1,850+ SKUs—covering over 95% of heavy-duty on-road applications
- Carefully vetted and selected global supply chain fully ISO/TS 16949-2009 Certified
- Broad range of Class 2B - 8 fleet applications including on-highway, commercial trucks, delivery vans, service trucks, buses, marine, mining, construction, agriculture, industrial - plus off-road applications
- Produced by the nation's fastest growing and most innovative Filtration Company
- ACES/PIES compatible Electronic Catalogs
- Covered by Product Liability Insurance and Limited Warranty
- Supported by an Award Winning Website
- "Smart Part Numbering" System to easily identify and organize inventory

WEBSITE & DATA MANAGEMENT

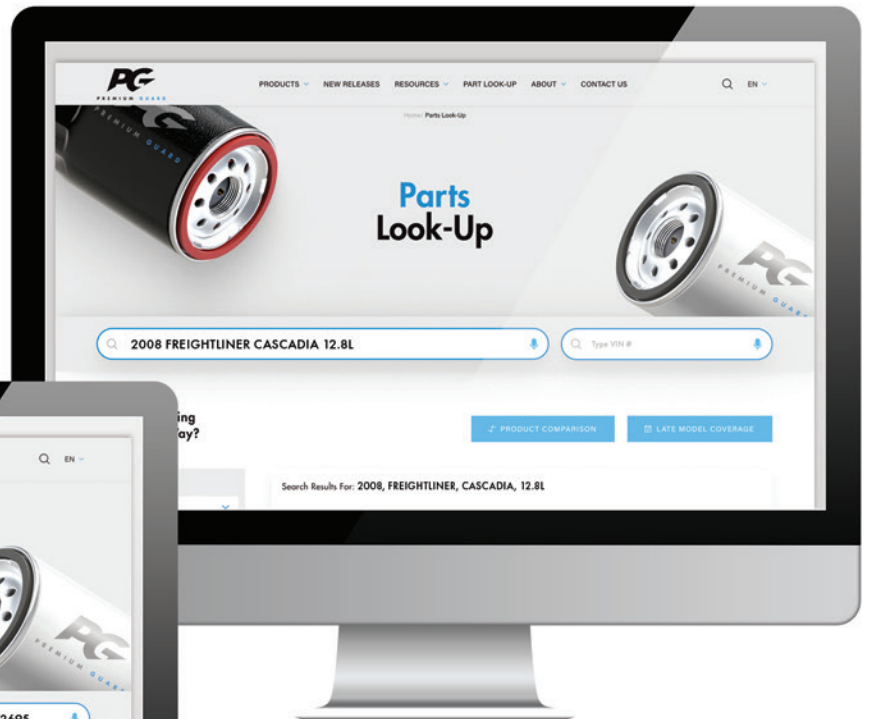

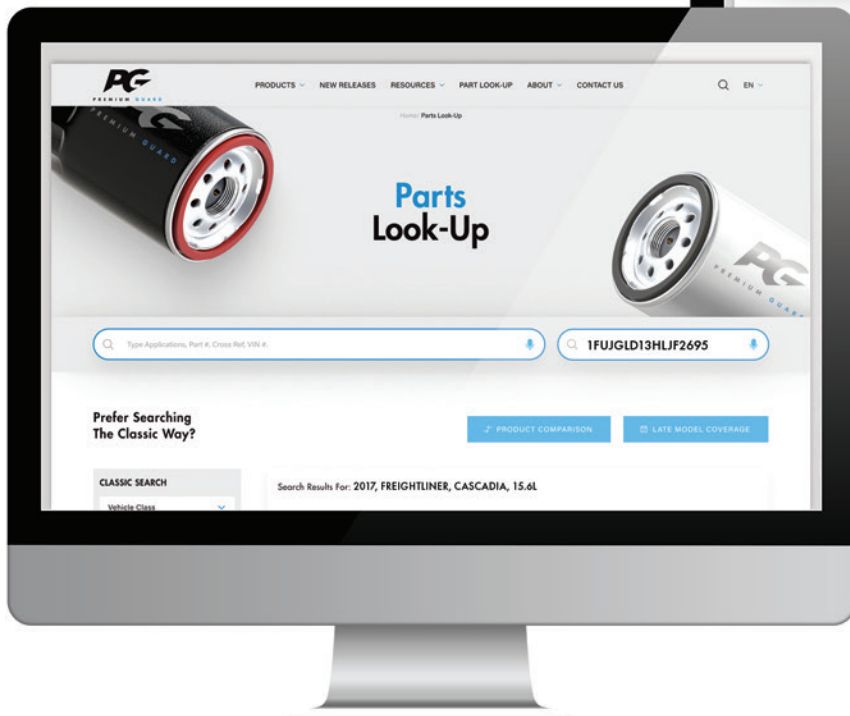

Award winning catalog content & data management team – Recognized by ACPN as one of top in class in 2021.

Fully compliant with ACES & PIES standards for data sharing using all industry customer formats.

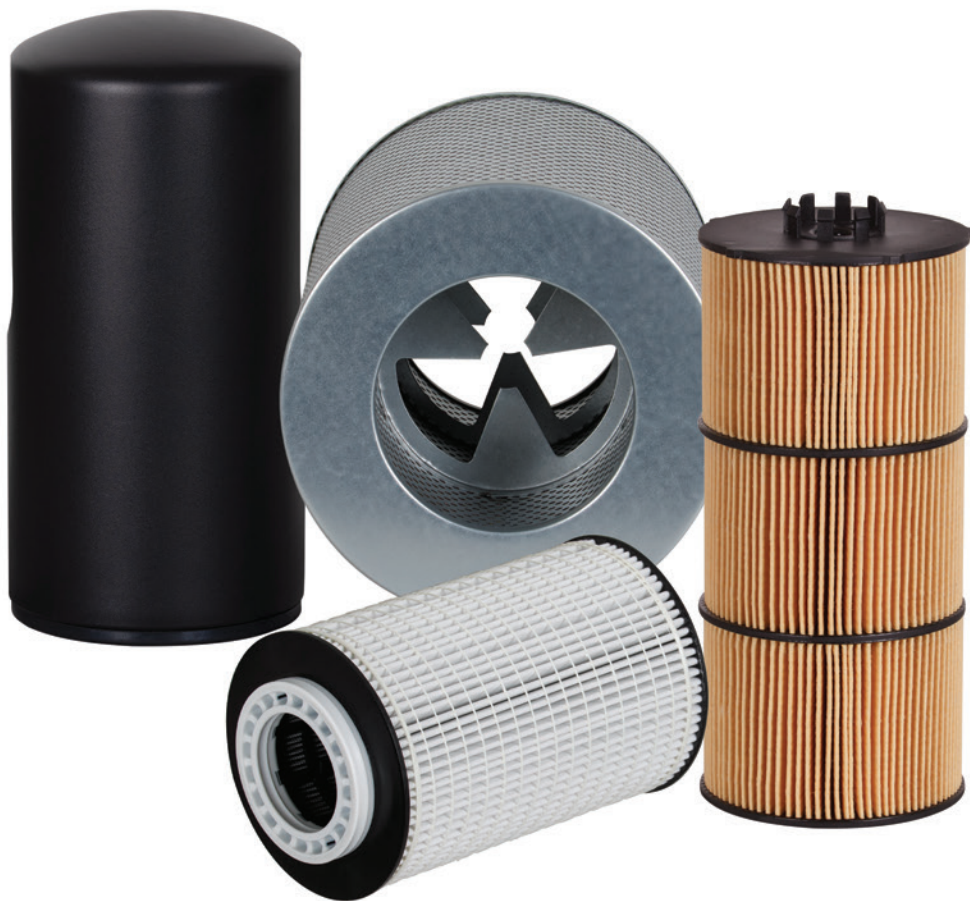

Comprehensive **"VIN Number Search"** lookup portal for ease in application & fitment searches ▼

"Dynamic Search" feature allowing rapid lookup of any application & corresponding fitment ▲

Premium Guard Heavy Duty Oil Filters are precisely designed and engineered to meet OEM requirements and fitment. Providing high efficiency and dirt holding capacity, our filters maximize oil flow resulting in optimal engine performance and longevity as well as enhanced fuel economy. A clean oil filter is essential to reducing premature wear and tear of friction components inside the engine.

- Engineered to meet or surpass OEM indicated change intervals, typically between 5K and 60K miles
- Superior multi-pass efficiency and removal of particles 4 microns and larger without sacrificing capacity
- Oil filters offer optimal results with superior media formulations

AIR FILTERS

Premium Guard Heavy Duty Air Filters offer enhanced engine performance, higher fuel efficiency and superior engine protection. A clean air filter is essential to keeping contaminants from entering the engine through the intake system. Our air filters are tested to the highest standards, ensuring optimal performance from both the air filter and the vehicle's engine.

- Engineered to deliver superior full life efficiency and dust holding capacity
- Increased air flow allows the engine to operate efficiently, which improves miles per gallon
- Optimal balance of flow restriction, initial efficiency, full life efficiency, and dust holding capacity

CABIN AIR FILTERS

Premium Guard Heavy Duty Cabin Filters are designed to keep dirt, dust, mold, mildew, pollen and other debris (leaves, insects, etc.) from entering the passenger compartment through the heating, A/C and defrosting systems.

- We have maximized the filtration area in our HD cabin filters without affecting the free-flow of air into the cabin
- HD Cabin Air Filters install smoothly with easy-to-follow product replacement instructions inside each Premium Guard Cabin Air Filter box. Installation only takes a few minutes in most trucks
- A clean cabin air filter helps to protect the heating and A/C systems
- Seasonal replacement recommended

Empowered with activated charcoal to eliminate odors and harmful gases resulting from mold build-up.

Designed to retain virtually all pollen and unwanted particles.

Premium Vision Heavy Duty Blades set a new standard for versatility and performance.

This comprehensive range includes

- **Narrow Saddle Flat**
- **Narrow Saddle Flex**
- and **Saddle Blades**

catering to a wide array of vehicle types and driver needs.

- Sizes ranging from 12" - 32" inches
- Heavy-duty trucks to commercial vehicles
- Superior wiping performance
- Enhanced durability & long-lasting quality

Premium Guard Heavy Duty Transmission Filters

prevent harmful contaminants such as dirt, grease and metal shavings from entering the vehicle's transmission fluid system. A clean transmission filter extends transmission life by protecting sensitive shift control valves and minimizing wear.

- All kits include a high quality rubber gasket with fitted bolt holes for easy installation
- Engineered to the highest standards and tested under extreme conditions
- Exceedingly durable sump, spin-on, and cartridge designs to match OEM specs

**HYDRAULIC
FILTERS**

Premium Guard Heavy Duty Hydraulic Filters

remove contaminants such as dirt and particulate matter from the vehicle's hydraulic system. A clean hydraulic filter protects and prolongs the life of the hydraulic system.

- Robust design per OEM specifications
- Ability to handle severe pressure spikes common in PTO filtration

COOLANT FILTERS

Premium Guard Heavy Duty Coolant Filters

ensure the vehicle's coolant system can pass sufficient amounts of coolant by keeping the system free from debris. A clean coolant filter can prevent debris, rust or other particles from cycling from the engine into the coolant system.

- Superior quality designs in keeping with OEM performance
- Protection equal to or better than competitive offerings
- Excellent value for aftermarket demands

DEF UREA FILTERS

Premium Guard Heavy Duty DEF Filters ensure clean diesel exhaust fluid is being supplied to the SCR System.

- Wide coverage with manageable SKU count
- Superior value with OEM-like design and attractive pricing

Premium Guard Heavy Duty Fuel Filters are designed and engineered to meet OEM requirements and fitment. Delivering high efficiency filtration, our filters meet modern engine demands for maximum fuel flow. Quality fuel filters are essential for protecting fuel injection systems from contaminants that may be in the fuel, ensuring optimal performance and fuel economy.

Often, fuel has contaminants originating from service station tanks or from corrosion in fuel system components as a vehicle ages; dirt, rust and water are the major impurities present in fuel. These contaminants can plug injectors and carburetors which can cause engine malfunction. Premium Guard Heavy Duty Fuel Filters are engineered for a long life of extended service intervals.

- Specially designed to handle low lubricity issues found in ultra low sulfur diesel fuels required today
- Excellent contaminant removal at low micron level (≥ 4 micron) without sacrificing dust holding capacity

FUEL/WATER SEPARATOR FILTERS

Premium Guard Heavy Duty Fuel/Water Separator Filters are key in ensuring clean fuel is delivered to the engine, without water or other particulate contamination.

- Multi-staged, specially formulated, synthetic medias address increased, harder to see water levels due to ultra low sulfur diesel formulations
- OEM-Grade performance regarding capacity, fine efficiency (4-5 micron level), and water separation
- Superior pressure resistance
