

## FUEL FILTERS

### ENGINEERED FOR RELIABLE FUEL FILTRATION

Premium Guard fuel filters deliver reliable protection and performance with broad application coverage and designs that match OEM fit and function. Engineered to remove harmful contaminants like dirt, rust, and water, they help maintain optimal fuel flow, system efficiency, and engine performance.

#### GASOLINE FUEL FILTERS:

Meet or exceed OE filtration requirements for dependable fuel system protection

Designed to protect modern gasoline/ethanol fuel systems

Precision-engineered for reliable performance and fit

Complete with all components for proper installation

#### DIESEL FUEL FILTERS:

High-efficiency media filters particles as small as 4 microns to protect precision fuel systems

Captures harmful contaminants, including tank debris, water, and condensation

Engineered for extreme conditions, built to handle high pressure, heat, and vibration

Complete with all necessary components for a proper, hassle-free installation
